

providing incentives so that we can drill for oil in the deep waters of the Gulf of Mexico. The people of Louisiana," he said, "welcome this production. We know it is good for our State, our country, and our economy."

I wonder if the Governor of Louisiana might pause today in calling for the government's assistance to clean up the worst oil spill, and arguably one of the worst environmental disasters ever to descend on our country, to consider whether that public policy statement made sense then and whether it makes sense now.

The consequences of that philosophy of unrestricted oil drilling, irrespective of the environmental concerns, irrespective of the need for reasonable and prudent regulatory oversight to protect the public from precisely this kind of unmitigated disaster, have now actually happened because a whole bunch of people in a position to know better put oil ahead of everything else, including the public interests.

I yield to my friend from New Jersey. Mr. HOLT. I thank the gentleman.

You spoke earlier about the liability, a very important principle that has been to some extent and should be to the full extent of American law in this area, which is, "polluter pays." That has been the basis of the Superfund program. That should be the basis for the oil liability legislation.

BP has said they will pay reasonable costs and that sort of thing. We shouldn't have to take their word for it. We shouldn't have to take the word of a company that has flagrantly cut corners in the past at huge cost to life and natural environment, whether you're talking about the Texas City refinery, whether you're talking about the blowouts on the North Slope of Alaska, whether you're talking about the blowouts on the pipeline in Alaska, whether you're talking about failure to level with the American public and even with the Coast Guard and the experts on how much oil was escaping from this very well. The number keeps shifting, and the oil company, I think, has not been fully forthcoming.

So this company asks us to take their word for it that they will pay, that they will pay for the cleanup, that they will pay for the environmental damages, they will pay for the economic damages and dislocation. I want

that established in law. The liability limit should be raised to many billions of dollars, if there is a limit at all.

Now, some here in the Congress, particularly from the other side, have said, "Well, but you'll drive out the mom-and-pop, you'll drive out the small independents." Well, you have to have the ability to prevent and repair and pay for any damages when you go into business.

The point of the oil liability legislation is not to protect small businesses; it's to protect our environment and the life of American citizens and the well being and economic opportunities for American citizens. And that means that the consideration should be how much damage can be done, and the liability limit should be large enough to cover the damage that can be done, not to ask whether this is going to put too much of a burden on a small company. The consideration should be, what is the damage? And there should be adequate liability to cover that.

I'm hopeful that, in the next week or so, we will raise this liability limit from the laughably small number of \$75 million to at least \$10 billion. And I thank the gentleman for joining me in this effort. The American public is crying for it. They want to know that in law and in fact BP will be held responsible for the damage they have done.

Mr. CONNOLLY of Virginia. I thank my colleague from New Jersey. Again, I thank him so much for his participation tonight and for his leadership, especially in leading us in a legislative remedy.

I want to end with this: on June 10, 2008, one of our colleagues actually said the following:

There are 3,200 oil rigs off the coast of Louisiana. During Katrina, not a single drop was spilled. Actually, 600,000 gallons were spilled, but more than 7 billion barrels have been pumped from these wells over the past quarter century. Yet only 1-1/1000th of 1 percent was spilled. We would suggest that JOHN MCCAIN revisit his reservations about ANWR and run against the "drill nothing" Congress. Energy development and the environment are not mutually exclusive. In fact, this Republican colleague said, we would suggest that the first joint town hall

meeting with Barack Obama, proposed by MCCAIN, be held on one of those offshore Louisiana rigs.

Surely, I hope our colleague did not mean this rig, the one that blew up, caught on fire, cost a number of lives, and led to the largest environmental disaster in American history.

Mr. Speaker, I yield back.
